NATIONAL-CLEVELAND INTERCHANGEABLE COUNTERBORES

prove how easily and with what advantage thrift may be practiced in the small tool field.

The National Patent Counterbore is made in three parts—only the cutter (one-quarter of the whole tool) being of high-speed steel. The shank and pilot are made of more durable and less expensive steel—a clear saving of 75 per cent of tungsten on the initial investment.

SHEPARD CRANES

It is a generally recognized principle that high grade machinery is necessary for successful and profitable operation.
In the selection of a crane, no matter how small, it is a matter of experience that quality should never be sacrificed to price.
It is the aim of the SHEPARD Electric Crane & Hoist Co. to produce the best grade apparatus that can be made, whether its capacity is small or large, and having made sure of the quality to produce it at the lowest possible cost.

Use a Tractocrane to Stock Coal

Why not use a locomotive crane to handle **coal** instead of *a derrick* and hoisting engine? It does the work quicker, better, cheaper and has the advantage of portability.

Write today for complete price and specifications. We will gladly send more information about this economical Buffalo Tractocrane.

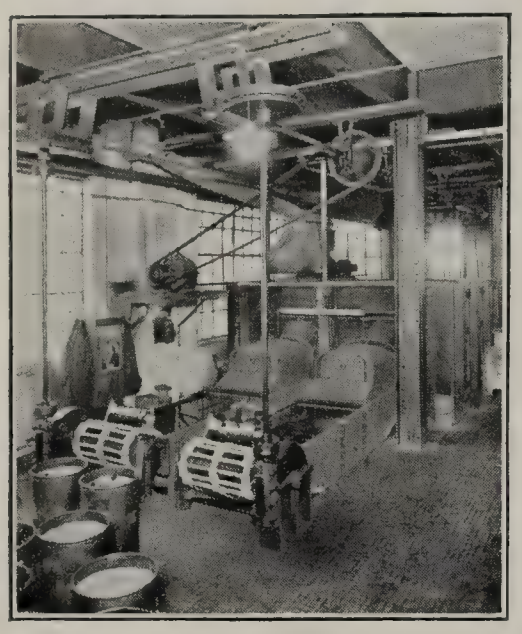
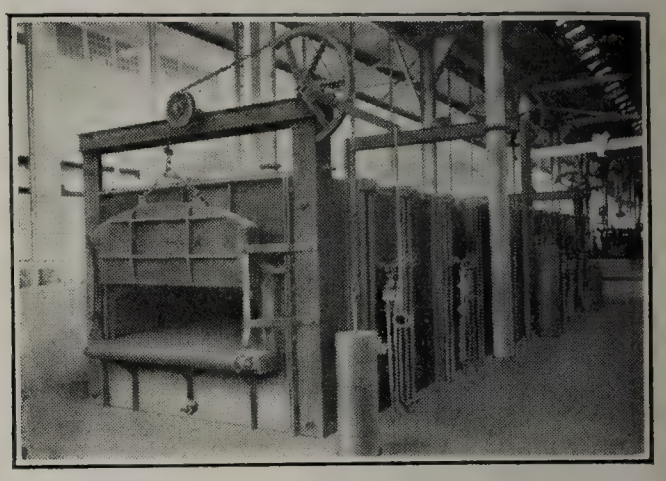
Complete Industrial Furnace Equipment

OIL GAS COAL



"FURNACE AND FUEL TO SUIT THE WORK"—is the rule governing our consideration of a new or the improvement of existing furnace equipment to suit **your** needs under **your** plant conditions. Our purpose is to deal with each case on its individual merits and to recommend changes in methods or equipment only when it is apparent that these will be productive of better results.

We do not merely sell furnaces, but rather means for efficiently producing results in industrial heating operations, which involves a great deal more than combining brick and iron or the burning of fuel.



"Rockwell Service" Solves Heating Problems

We make inspection of plant, devise methods and means of working, prepare plans, furnish complete industrial furnace equipment and guarantee results, using coal, coke, gas or oil, as the best interests of our patrons require.

The following list of furnaces and appliances illustrates the variety of work we do and our familiarity with furnace and fuel problems:

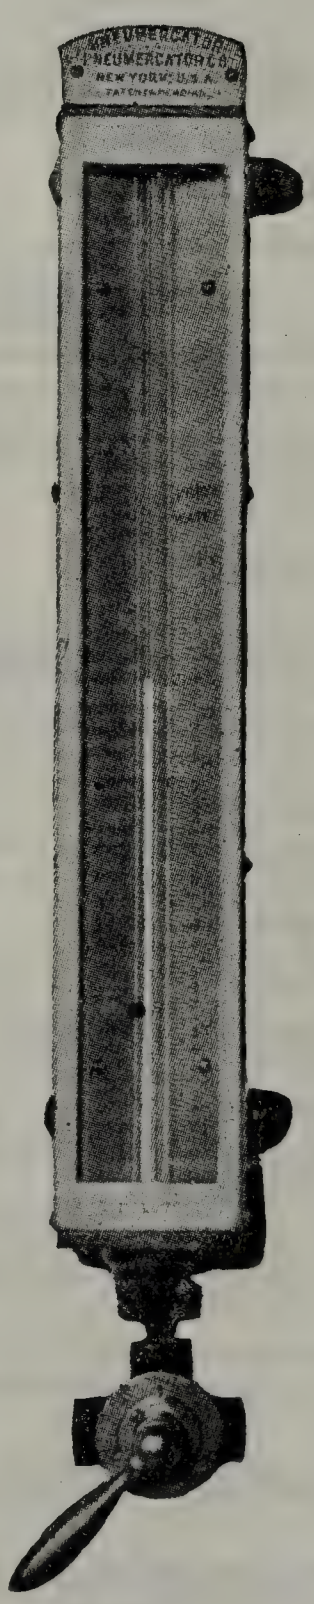
THE PNEUMERCATOR



MODEL T-I

THE Model T-I Pneumercator indicates the depth, and weight or volume, of any liquid sufficiently mobile to seek its own level under force of gravity, which is contained in tanks, stills, reservoirs, evaporators, standpipes, or receptacles of any shape or size in any location. The Indicator (illustrated) may be located at any convenient point, at any reasonable distance from, above, or below the liquid.

The Pneumercator furnishes a perpetual inventory, and an accurate check on the liquid put in or taken out of tank.

There are no moving parts, no floats or diaphragms used.
